A Practical Guide to
USPS® Prices

Rates effective 5/11/2009

Ways to apply the new
prices to your advantage.

WAYS TO SAVE

Quick Overview
First-Class Mail® Strategies
Standard Mail® Strategies
Priority Mail®, Express Mail® and Package Services Strategies
Extra Services Strategies
Since 1971, whenever the U.S. Postal Service wanted to revise pricing they needed to file a rate case—a complex proceeding that involved long lead times and several regulatory reviews. With no pre-set limits on what could change, mailers sometimes faced significant increases and new sets of rules.

That all changed with the passing of the Postal Accountability and Enhancement Act. Under the new rules, price increases for most services (see sidebar) are now limited to the rate of inflation, as measured by the Consumer Price Index. The Postal Service no longer needs to file a "rate case", instead they must publish new pricing at least 45 days in advance. There is still regulatory oversight, and the Postal Regulatory Commission provides the public with 20 days to comment on whether the proposed pricing is consistent with statutory requirements.

Schedule for Regular and Predictable Price Changes

By law, the USPS is required to maintain a schedule for future price increases. This schedule is posted on the Postal Regulatory Commission website, www.prc.gov. The Postal Service expects to implement price changes for all of the market-dominant classes in mid-May of each year.

The Postal Service expects that all of the market-dominant classes will experience a price increase each year equal, on average, to the applicable price cap limitation. In December 2008, the Price Cap for market-dominant products was 3.8%.

Pitney Bowes: your resource for innovation and savings

As the world's leading provider of mailstream solutions, we understand the critical role mail plays in terms of your marketing, operations and financial well-being. Through this guide, we'll not only inform you of the key changes – we'll show you how you can work the new rules to your advantage. With dozens of practical strategies, you can choose best practices that make the most sense for your business.

To make it easy, we have organized this tool into distinct sections, so you can explore the areas that are most pertinent to your needs without getting bogged down in unnecessary details. And, of course, your Pitney Bowes representative is always available to answer your questions, and help you customize an approach that's right-sized for you and your company.

**First-Class Mail®**

Shape-based pricing, which was introduced in 2007, is still in effect—which means the shape and format of your mailpiece will have a significant impact on your cost. You can expect modest increases for most types of mail, with no change (or decreases) for each additional ounce.

For more details, including new rate tables, please visit www.usps.com/prices.
GO THE EXTRA OUNCE

With no increase in the cost of each additional ounce, you can offset rising costs by putting more into each and every communication.

The Opportunity

You can still send each additional ounce of First-Class Mail® at the same low cost, including letters, flats and parcels.

Smart Mailstream Practices

Companies who already send a high volume of two- and three-ounce letters will continue to save on overall postage expenses as the cost for each additional ounce remains unchanged. Others should consider whether they can increase bottom-line profits by adding additional content to existing mail.

- **Use your transactional mail for marketing purposes.** You can promote other products and services by adding inserts, brochures and cross-sell materials to statements and invoices.

- **Increase the number of inserts.** If you are already including inserts, it may be cost effective to add even more. Depending on the size and weight of each insert, you may be able to add up to six or more new components per ounce.

- **Combine multiple communications into one envelope.** If you are planning to send a notification or reminder to your customers, you could save money by combining this communication with another mailing, such as a statement. Likewise, if you have customers who currently receive two or more statements each month, consolidating these into a single envelope (a practice known as householding) can reduce your expenses dramatically.

Overall, with no increase in the additional ounce rate, you can save money by sending fewer, but more valuable, mail pieces. But be careful – once you exceed the 3.5 ounce threshold for letter mail, your piece will be classified as a flat, which will increase your costs.

Making it Happen

Going the extra ounce means more than stuffing envelopes – it means adding speed and intelligence to your mailstream.

**Intelligent Inserting.** Having the ability to selectively insert allows you to choose which customers receive which components, giving you the control and flexibility you need to target messages to the right person. You can even print and scan marks that include specific processing instructions for each mail piece. OMR (Optical Mark Recognition) helps ensure accuracy and mail piece integrity. By automating and integrating the entire process of mail creation, from document generation through folding and inserting, you can gain end-to-end efficiencies.

**Document Enhancement.** Combining seemingly disparate communications requires some planning, but may be easier than you think. Printstream engineering gives you the flexibility to modify and combine the print-ready files created by your existing applications – without disrupting your underlying operations or mission-critical systems.

**Accurate Weights, Lower Postage.** There's no need to sort your mail by weight before you apply postage, as today's leading mail systems can automatically weigh and rate each mail piece on the fly, so you won't overpay for postage.

For more information, please contact us.

Going the extra ounce may make sense if you:

- Are looking to strengthen relationships with existing customers
- Mail multiple communications to the same individual
- Would like to sell additional products and services

Pitney Bowes makes it easier for companies to get more out of each communication through mailstream solutions such as:

- Automatic Inserting Solutions
- Document Generation Software
- Digital Mailing Systems

For more information, please contact us.
FLATS TO FOLDED

By converting flats into letter-size mail, you can take advantage of lower postal rates.

The Opportunity

With the rates for single-piece flats increasing by five cents, the price difference between flats and letter-size mail is now even greater. By conforming to letter-size dimensions, you can save $0.44 on every piece.

Smart Mailstream Practices

By having a good understanding of what constitutes a letter vs. a flat, you can take steps to create mail pieces that are easier for the post office to process.

- **Design mailpieces to meet letter-size dimensional requirements.** While many letters are already created to fit inside a standard #10 envelope, you actually have a lot of flexibility to create mailings of different sizes – and still qualify for the lower letter-size rates.

- **Convert flat mail to letter-size mail (up to and including 3.5 ounces) with a single fold.** The concept of “flats to folded” is important if your current mailings are between one and 22 pages. (Higher page counts are unlikely to qualify for letter-mail rates as the weight will likely exceed the 3.5 ounce limit.) In simplest terms, converting flat mail to letter-size mail would be one of the easiest ways to cut costs and mitigate the rate increase.

- **Repackage parcels as flats.** With the new pricing, the postage for parcels is 34 cents higher than flats. However, a flat-size mailpiece could be up to 3/4 inches thick – which may make it possible for you to repackage mailings that you currently send as parcels to meet the flat-rate requirements. In addition to meeting the Flat Dimensions noted to the right, flat-size mailpieces must be uniform in thickness, flexible and rectangular in shape.

Making it Happen

The price change creates many opportunities for savings through proper mailpiece planning.

**Precision Folding.** If you’re looking for a quick ROI fix, a heavy-duty folder combined with an intelligent inserting system can provide you with the high-speed, automatic feeding and folding required to transform documents into a size appropriate for a 6” x 9” letter – all with a single fold. Not only can you save on postage, you can increase speed and productivity across your entire operation.

**Automatic Rating.** Mailing systems with dynamic weighing and postage rating by shape technology maximize efficiency by processing mixed weight material up to 16 oz. in a single operation. Each piece is automatically weighed and measured, ensuring an accurate postage calculation.
MAIL THAT’S MACHINE-READY
The nonmachinable surcharge adds to cost on nonmachinable mail.

The Opportunity
The “nonmachinable surcharge” – which is assessed when First-Class Mail® letters are designed in ways that make it difficult to process – adds 20 cents to each piece.

Smart Mailstream Practices
By knowing the guidelines, you can design mailpieces to meet letter-size dimensional requirements and avoid nonmachinable characteristics.

A letter-size piece is considered nonmachinable if it has one or more of the following characteristics:

- Weighs more than 3.5 ounces
- Has an aspect ratio (length divided by height) of less than 1.3 or more than 2.5
- Measures more than 4.25 inches high or 6 inches long, and has a thickness of less than 0.007 inch (0.009 inch for commercial letters.)
- Is rigid or contains odd-shaped contents
- Is polybagged, polywrapped, or enclosed in any non-paper material
- Includes clasps, strings, buttons, or similar closure devices
- Is a self-mailer with a folded edge perpendicular to the address and is not folded and secured (e.g., tabbed)
- Contains items such as pens, pencils, keys or coins that cause the thickness of the mailpiece to be uneven.

Making it Happen
When you have an unusual mailpiece, take a moment to determine whether it meets the machinable requirements. And if not, what you can do differently to meet the letter-requirements. Whoever is designing your mailpieces and marketing promotions should also be brought up to speed on these guidelines. Some mail creation tools which can help include:

**Duplex printing.** If your mailpieces are over 3.5 ounces, you should consider duplex (two-sided) printing. That will help you save on paper costs, as well.

**Tabbers.** If you send self-mailers, newsletters, catalogs or flyers, you may want to consider a tabber, which applies the wafer seals needed to secure your mailpiece.

**Inserters and Folders.** These automation tools give you the flexibility you need to produce a broad range of effective mail formats.

**Letter Dimensions**

<table>
<thead>
<tr>
<th>Maximum Height</th>
<th>Minimum Height</th>
</tr>
</thead>
<tbody>
<tr>
<td>6 1/8&quot;</td>
<td>3 1/2&quot;</td>
</tr>
</tbody>
</table>

**Thickness**

- 0.007” minimum
- 1/4” maximum

Pitney Bowes makes it easier for companies to create USPS compliant mail with mailstream solutions such as:
- Automatic Single Tabber
- High Speed Laser Printer
- Automatic Inserting Solutions
- Mail Folding Systems

For more information, please contact us.
WATCH YOUR WEIGHT
Avoid more costly flat-rate pricing by keeping your letter-size mailpieces to 3.5 ounces or less.

The Opportunity
As the USPS works to better align their rates with actual processing costs, they will charge flat-size prices (or even parcel prices) for letter-size mailpieces that exceed 3.5 ounces in weight.

Smart Mailstream Practices
By carefully managing the make-up of your mailpieces, you can maximize impact while keeping your mailpiece weight in letter-size range.

- **Design mailpieces to meet letter-size dimensions.** To qualify as “letter-size”, your mailing doesn’t have to fit into a standard #10 envelope – but it does have to comply with USPS standards for letter-size mail. You have a lot of flexibility to create mailings that can stand out while staying within “letter-size” specifications.

- **Use your weight wisely.** You can say a lot in 3.5 ounces. Duplex printing, lighter paper stock, smaller inserts – all of these can help you keep your content intact while trimming the weight of your mailpiece overall. Make sure that you include all the elements when you weigh in.

- **Prioritize your messaging.** If you’re still over the weight limit, take a good look at your mailpiece contents. When extra inserts put you over 3.5 ounces, you need to do a quick cost-benefit analysis: does it make more sense to include the inserts now, to push them back to a later date, or even to leave them out altogether? Make sure they’re worth the added expense.

Making it Happen
**Duplex printing.** Duplex or two-sided printing can enable you to reduce mailpiece weight – and reduce paper costs as well. It’s environmentally friendly and commonly used in today’s cost-conscious world.

**Document Enhancement.** Modifying and combining the print-ready files created by your existing applications may sound like a daunting task. But new technologies make it simple to change document sizes with minimal disruptions to your underlying operations and mission-critical systems. Be sure to check with your mailstream expert to see how easy the change can be.
COMMUNICATE WITH POSTCARDS
These highly targeted mailings can keep you top-of-mind at lower costs.

The Opportunity

While postcard rates will rise under the price change, the cost to send postcards would still be 36% less expensive than a letter.

Keep in mind, the postage for a First-Class Mail® postcard would in most cases remain cost-effective even when compared to a Standard Mail® letter.

Smart Mailstream Practices

Think about ways you can communicate with customers and prospects in the most effective manner.

Augment your communication plan with postcards. Postcards are easy to produce and can be personalized for each customer. They are ideal for notifications, invitations, reminders and lead generation – and any communication that requires a quick turnaround. In addition to lower postage costs, the simplicity of postcards can help you save money on production, too. To qualify for postcard rates, however, your mailpiece must conform to USPS requirements.

Increase communication frequency. Postcards are also a great way to connect with customers. Follow-up communications and reminder postcards can help you generate a lift from your other marketing efforts more cost effectively.

Meter or use a permit indicia. You can set your mailing machine to meter postcards at the lower postcard rates, the same as any other mail you send. If you are having postcards printed, however, you may also want to consider a permit imprint, which may take up less space.

Making it Happen

Creating and mailing postcards is easy, if you have the right tools.

Postcard Addressing: With the right system, you can print addresses on each card and avoid the less-professional look of a label. Many solutions also offer you the opportunity to print personalized messages, so you can make each piece even more relevant. As a final touch, the automatic creation of a barcode can help speed delivery and lower postage costs, too.

Postage Printing: If you are printing postcards, you may want to consider getting a USPS permit, so you can pre-print your indicia directly onto your card. Otherwise, you can easily run your postcards through your postage meter – just be sure to set the postage amount to the lower rate.

Postage Payments: If you are going to use a USPS permit, you can eliminate many of the hassles associated with postage payments and reconciliation by taking advantage of smart payment solutions. For example, the Purchase Power account makes it easy to add permit postage expenses directly onto your existing Pitney Bowes postage statement – and pay later, after you mail.

For more information, please contact us.
SORT OUT THE SAVINGS

A simple presort can practically offset the impact of the rate increase.

The Opportunity

The First-Class Mail® presort rate is more than two cents less than today’s single-piece rate.

You can achieve even lower rates at the 3- or 5-digit presort levels. A one-ounce letter sorted to 5-Digit ZIP Codes, for example, would cost only $0.33 to mail.

Smart Mailstream Practices

The concept of worksharing gives you the opportunity to save money by doing some of the presort work normally done by the postal service.

Presort Savings. If you are sending at least 500 mailpieces within the same processing category (letters, flats, parcels), you can presort First-Class Mail® to save nearly 6%. Basically, “presorting” means grouping your mail by ZIP Code. All of the pieces going to the same destination get grouped into the same package or tray. You’ll sort to specific areas, and then work your way up to more general areas.

The Automation Advantage. If you decide to presort your mail, you are already doing most of the work – so it pays to take it to the next level: automation. The USPS offers more significant savings for automation-compatible mail because it is much easier to process, so you can cut postal costs by up to 23%. To qualify for automation rates, you need to print a delivery point barcode on each mailpiece, and use an address list that has been validated against the USPS databases.

Making it Happen

Presorting could be complex if you tried to utilize a manual process, but today’s software solutions make it easy. All of the USPS guidelines are pre-programmed, so your mail will automatically be sequenced in the order that maximizes your postal discounts.

Presort Software. Today’s leading solutions do more than sort your mail – they improve your address quality as well. When considering options, look for software that is CASS-certified (this is the USPS Coding Accuracy Support System) and PAVE-certified (this stands for Presort Accuracy Validation and Evaluation) so you can benefit from better addresses, more accurate presorts and all of the required mailing forms. Delivery Point Validation (DPV™) verifies that an address exists prior to mailing. While this may all sound complicated, the right software makes it easy.

Move Updates. Keeping your addresses up-to-date not only helps you save money on postage – it helps ensure that more of your mail reaches its intended recipient. And if you are presorting mail, you will be required to update your lists using the latest USPS National Change of Address information within 95 days of your mail date.

Barcode Printing: Many software solutions give you the capability to print address and barcodes on a document as part of your mailing address. An alternative approach is to use a specialized address printer, which provides the crisp, direct-to-envelope address and imaging to create a more professional look. With the addition of spot color and personalized messages, these solutions can help ensure more of your mail is opened and read.

For more information, please contact us.

Pitney Bowes offers a broad range of solutions that can make it easier for you to save money, including:

- SmartMailer™ Mail Management Software
- AddressRight® Pro Software
- VeriMove™ Software
- Address Printers
- Intelligent Mail® Solutions

High-volume mailers may want to consider the Group 1 Software line of mailing efficiency solutions, including:

- CODE-1 Plus™ Computer Program
- MailStream Plus™ Mail Sortation Software

AADC Rate
RETURN TO SENDER: TACKLE THE HIGH COST OF RETURNED MAIL

As the USPS hones in on the high-cost of Undeliverable as Addressed (UAA) and Returned Mail, mailers can find additional savings by tackling their own returned mail challenges head on.

The Opportunity

In 2006, the USPS announced plans to reduce UAA mail by 50% by 2010. Nearly one in every four addresses is mailed with one or more errors.

Common address deficiencies:
- Moved (2.8%)
- Apartment Number (4.9%)
- Directional Suffix (7.0%)
- Rural Route/Box Number (0.4%)
- Street Name/Number (6.9%)
- City/State/Zip (3.1%)
- Incorrect ZIP+4 (2.6%)

Actual Address Deficiencies

<table>
<thead>
<tr>
<th>No Deficiencies</th>
<th>Pieces with Deficiencies</th>
</tr>
</thead>
<tbody>
<tr>
<td>76.5%</td>
<td>23.5%</td>
</tr>
</tbody>
</table>

Smart Mailstream Practices

Every piece of mail returned is a reminder that you may not know your customers as well as you thought. You should consider the mail you get back to be the tip of the iceberg, because a lot of UAA mail actually makes its way to the intended recipient through the sheer determination of the postal service and even more mail arrives despite mistakes in the customer's name – neither of which is necessarily good for your company.

Many mailers look at returned mail as a “cost of doing business” – but if you took the time to total these costs, you may find a windfall of opportunity, as it doesn't take a big investment to save a lot of money.

The true cost of returned mail includes:
- print and mail costs of initial mailer
- postage on initial mailing
- lost sales opportunities
- increased call volume
- unnecessary collection calls
- handling of returned mail

Making it Happen

Estimates place the hard costs of returned mail to be more than $3.00 per mail piece – and a number of firms have reported bottom-line savings totaling tens of thousands of dollars simply by addressing this issue head on. Some best practices include:

Move Updates. Keeping your addresses up-to-date not only helps you save money on postage – it helps ensure that more of your mail reaches its intended recipient. And if you are presorting mail, you will be required to update your lists using the latest USPS National Change of Address information at least once every 95 days.

Delivery Point Validation. Delivery Point Validation is a USPS-based system available through many presorting software solutions that enables users to verify an address actually exists. Since August 2007, this has been required in order to achieve automation rate discounts.

Closed Loop Address Management. Many problems occur at the point of data entry, so taking the time to ensure that you key in addresses correctly is a good start. Then, when you receive corrections (whether from the customer or the USPS), it is important that you update your records as soon as possible.

For more information, please contact us.
Mailers can save up to 12% on the cost of mailing by taking advantage of the Pitney Bowes PresortXtra Solution.

The Opportunity

Across the board, there are increases in the cost of postage for virtually every class of mail. With adjustments for inflation (as measured by the Consumer Price Index), the full cost of First-Class Mail® increases to 44 cents for a one-ounce letter.

### Smart Mailstream Practices

If you’re a high-volume mailer, you can save money by presorting your mail. But if presorting mail in-house doesn’t make sense to you, you can still get the benefit of presorting – including reduced postage rates – without doing the work.

**The PresortXtra Solution.** Under this program, Pitney Bowes will pick up outgoing mail directly from your office. Your mail will be commingled and presorted with mail from other companies, and then sent out the next day. Best of all, you can meter your mail at a lower rate, which saves you money.

You’ll save from 6% to 12% – thereby mitigating the effect of the rate increase. Plus, as part of this discount program, you’ll also benefit from automatic address verification, automatic move update services and no-cost pickups. Depending on your mail volume, the PresortXtra Solution could help you save thousands of dollars with no additional work required.

### Making it Happen

Customers who will benefit from and qualify for the Postage Discount Program:

- Mailers with a minimum of 1,000 pieces of qualifying mail per scheduled pickup,
  
  **OR**

- Mailers with a minimum of 500 pieces of qualifying mail every day

- Mailers must be located in an eligible PDP location

**PB PresortXtra Solution**

THE ECONOMY CLASS: WHEN STANDARD MAIL® MAKES SENSE

With one low price for up to 3.3 ounces, switching to Standard Mail could make good economic sense in certain situations.

The Changes

While Standard Mail® postage rates will increase, these rates are much lower than First-Class Mail® rates, especially for higher-weight mailpieces.

Smart Mailstream Practices

Every time you have a mailing of 200 pieces or more, (or total weight of the mail equaling 50 lb. or more) within the same processing category (letters, flats, parcels), it makes sense to carefully consider which class is best.

When to mail First-Class Mail®:
Some materials must be mailed First-Class Mail®:
  • Handwritten or typewritten materials
  • Bills, statements of account and invoices
  • Personal correspondence

When time is of the essence:
  • First-Class Mail® will reach most domestic destinations in 2-3 business days
  • However, there are ways to speed up the process of Standard Mail® – such as making sure your mail is automation-compatible and dated with a meter indicia

When you do not have the ability to presort your mail:
  • Sending fewer than 200 pieces or less than 50 lb.
  • Do not currently have easy-to-use presort software

When to mail as Standard Mail®:
You may want to consider Standard Mail® rates for all other non-personal mail options, particularly when your marketing mail, newsletters or other mass communications are over one ounce.
  • The minimum mail quantity is 200 pieces (or mailing equal to 50 or more pounds)
  • The per-piece rate for Standard Mail® is good for mail up to 3.3 ounces. The postage on heavier mailpieces is based on a piece/pound calculation.

Making it Happen

Presort Software. The biggest challenge of Standard Mail® is that you have to presort your mail. And while the presort rules are complex, a good software application can do almost all of the work for you, including the preparation of any USPS required forms. When considering options, look for software that is CASS™ Certified (this is the USPS Coding Accuracy Support System) and PAVE™ (this stands for Presort Accuracy Validation and Evaluation) so you can benefit from better addresses, more accurate presorts and greater discounts.

Maintain Your Image. Saving money is smart, and you can look good too. Printing your postage indicia with a meter vs. a permit is the first step to a professional look. Plus, high-quality address printers provide crisp, precise, direct-to-envelope imaging and some even allow you to add spot color and personalized messages, which can help lead to more of your mail being opened and read.

High-speed processing. Producing high-volume mail in-house may be easier than you think. Mailstream automation solutions, including document folders and inserters, give you the flexibility you need to produce a broad range of effective mail formats.

FLATS TO FOLDED

By converting flats to letter-size mail, you can take advantage of lower rates.

The Opportunity

With shape-based pricing, the cost for Standard Mail® flats remains significantly higher than the cost for letter-size mail. Depending on the types of presort you do, you could be paying more than double the postage for a flat-size mailer.

Smart Mailstream Practices

By having a good understanding of what constitutes a letter vs. a flat, you can take steps to create mail pieces that are easier for the post office to deliver.

- **Design mailpieces to meet letter-size dimensional requirements.** While many letters are already created to fit inside a standard #10 envelope, you actually have a lot of flexibility to create mailings of different sizes – and still qualify for the lower letter-size rates.

- **Convert flat mail to letter-sized mail with a single fold.** The concept of “flats to folded” is important if your current mailings weigh less than or equal to 3.3 ounces. (Over 3.3 ounces, postage is based in part on the same per pound rate for both letters and flats.) In simplest terms, converting flat mail to letter-size mail is one of the easiest ways to cut costs and mitigate the rate increase. For example, documents that currently measure 8 1/2” x 11” can be folded once to fit into a 6” x 9” envelope, or twice to fit into a #10 window envelope, which will allow you to qualify for significantly lower rates.

Making it Happen

The price change creates many opportunities for savings through proper mailpiece planning.

**Precision Folding.** If you’re looking for a quick way to save postage, a heavy-duty folder combined with an intelligent inserting system can provide you with the high-speed, automatic feeding and folding required to transform documents into a size appropriate for a letter rate. For many documents, one fold will get you into a 6” x 9” envelope, two folds for a standard #10. Not only will you save on postage, you’ll increase speed and productivity across your entire operation.

**Automatic Rating.** Mailing systems with dynamic weighing and postage rating by shape technology maximize efficiency by processing mixed weight material up to 16 oz. in a single operation. Each piece is automatically weighed and measured, ensuring an accurate postal calculation.

For more information, please contact us.
AVOID HIGHER COSTS FOR NONMACHINABLE MAIL

Taking the time to ensure your mail is machinable could cut your postage costs in half.

The Opportunity

Creating mail that is easier for the USPS to process continues to be important under the latest price increase. The cost for nonmachinable letters is significantly greater than machinable mail, and higher Not Flat-Machinable rates will be assessed on mail that is too thick or rigid for machine processing.

In 2009, the USPS eliminated a number of Not Flat-Machinable categories (such as 3-digit) and other categories are now only available if your mail qualifies for Entry Discounts (such as 5-digit). These changes may further increase the cost of any Not Flat-Machinable mail you send.

<table>

</tr>
</tbody>
</table>

*Available only on mail that qualifies for Entry Discounts.

For pieces 3.3 ounces or less.

Smart Mailstream Practices

By knowing the guidelines, you can design mailpieces to avoid the Not Flat-Machinable category, which will apply to:

- Mail that is too thick or too rigid to run on the USPS processor
- Mailpieces smaller than 5” x 6” and thicker than 1/4” (up to 1 1/4”)
- Mailpieces longer than 15” (up to 15 3/4”)
- Mailpieces thicker than 3/4” (up to 1 1/4”)

Making it Happen

When you have an unusual mailpiece, particularly one that is rigid, take a moment to determine whether it meets the machinable requirements – and if not, what you can do differently. Whoever is designing your mailpieces and marketing promotions should also be brought up to speed on these guidelines.

Adjust Packaging. It may be possible for you to modify your envelope or mail kit to conform to the guidelines. You may also want to rethink what you are sending. For example, if you currently include pens or key chains in envelopes as a promotional item, perhaps you could find an alternative premium that is more mail-friendly.

Duplex Printing. If your mailpieces are thicker than 3/4”, you should consider duplex (two-sided) printing. That will help you save on paper costs, as well.

Automated Folding and Inserting. These automation tools give you the flexibility you need to produce a broad range of effective mail formats.

For more information, please contact us.
AUTOMATE YOUR DISCOUNTS

As presorting Standard Mail® by hand becomes even more complex, software solutions add simplicity – and added savings.

The Opportunity

Under the new rate structure, there are 13 presort tiers for Standard Mail® letters, with the lowest being the Saturation Rate ($0.182) and the highest being the Nonmachinable Mixed ADC Rate ($0.578). With more than a 300% difference between these two extremes, presort strategies may become even more important.

Smart Mailstream Practices

Ensuring that more of your mail qualifies for Automation Rates is one of the best ways to offset the postal rate increase.

The Automation Advantage. If you presort your mail, you are already doing most of the work – so it pays to take it to the next level: automation. The USPS offers more significant savings for automated mail because it is so much easier to process, so you can cut postal costs dramatically. To qualify for automation rates, you need to print a delivery point barcode on each mailpiece, and use an address list that has been validated against the USPS database.

Avoid Nonmachinable Formats. Designing mailpieces that can be processed efficiently will help you avoid the significant increases in nonmachinable mail.

Making it Happen

Presorting could be complex if you tried to utilize a manual process, but today’s software solutions make it easy. All of the USPS guidelines are pre-programmed, so your mail will automatically be sequenced in the order that maximizes your postal discounts.

Presort Software. Today’s leading solutions do more than sort your mail – they improve your address quality as well. When considering options, look for software that is CASS® Certified (this is the USPS Coding Accuracy Support System) and PAVE™ (this stands for Presort Accuracy Validation and Evaluation) so you can benefit from better addresses, more accurate presorts and all of the required mailing forms. While this may all sound complicated, the right software makes it easy.

Barcode Printing: Many software solutions give you the capability to print barcodes on a document as part of your mailing address. You may also want to use a specialized address printer, which provides crisp, direct-to-envelope address and imaging to create a more professional look. With the addition of spot color and personalized messages, these solutions can help lead to more of your mail being opened and read.

For more information, please contact us.

Pitney Bowes offers a broad range of solutions that can make it easier for you to save money, including:

• SmartMailer™ Mail Management Software
• AddressRight® Pro Software
• VeriMove™ Software
• Addressing Printers
• Digital Mailing Systems
• Intelligent Mail® Solutions

High-volume mailers may want to consider the Group 1 Software line of mailing efficiency solutions, including:

• CODE-1 Plus® Computer Program
• MailStream Plus® Mail Sortation Software
Drop Off Closer to Destinations

Entry Discounts provide for the lowest rates possible.

The Opportunity

The USPS continues to provide discounts for Standard Mail® mailers who enter their mail closer to the delivery destination. By transporting your mail to the appropriate DBMC or DSCF, you could save up to 18% or more.

Destination Bulk Mail Center (DBMC) There are 21 DBMCs in the U.S., which handle mail for large areas. To qualify for DBMC rates, your mailpieces must enter and be addressed for delivery within the service area for that particular DBMC.

Destination Sectional Center Facility (DSCF) There are 350 DSCFs in the U.S. and you can receive a greater discount by entering your mail at one of these facilities. To qualify for DSCF rates, your mailpieces must enter and be addressed for delivery within the service area for that particular DSCF.

Smart Mailstream Practices

Obviously, getting mail to a DBMC or DSCF will require some effort on your part, but it may make sense to determine if entry discounts make sense for you.

Locate your local bulk mail centers. There may be a location near you. You can find a listing, which includes hours and directions, at www.usps.com/bulkmailcenters.

Analyze your mail files. Do you tend to mail to a lot of people in the same area? Are your mailings concentrated in a certain region or geography? If so, saving on postage may be easier than you think.

Get the savings you’re entitled too. Even if you conduct national mailings, you can still take advantage of the discounts for all mail within the service area of your drop-off point.

Making it Happen

With a pencil and calculator, you can easily estimate the extra discounts you can earn. Simply compare these discounts to the costs you would incur in getting mail to an appropriate drop-off point to see how much you can save.

Presort Software. The leading solutions can automatically calculate the destination discounts you’ve earned, whether all of your mail qualifies for entry-level discounts or only a small portion. When considering options, look for software that is CASS Certified™ (this is the USPS Coding Accuracy Support System) and PAVE™ (this stands for Presort Accuracy Validation and Evaluation) so you can benefit from better addresses, more accurate presorts and all of the required mailing forms.

For more information, please contact us.

For letters 3.3 ounces or less
ENJOY FLAT-RATE PRICING, COAST TO COAST

With even more flat-rate pricing options for Priority Mail®, you can ship parcels up to 70 lb. door-to-door more affordably.

The Opportunity

The USPS has added a new “small-size” Flat Rate Box that lets you send up to 70lbs anywhere in the US for as little as $4.75. This sized box is perfect for jewelry, electronics, event tickets or other small items that need expedited shipping.

Smart Mailstream Practices

You can ship your letters or packages in an average of 2-3 days with Priority Mail® Flat Rate Envelopes and Boxes. All you need to do is reformat your parcels, documents and packages so that they work within the Flat Rate Envelope and Box shapes. Best of all, you can order the envelopes and boxes at no cost to you right from the USPS website.

Flat Rate Envelopes

- The dimensions of the envelope are 12.5” X 9.5”
- The contents of the flat rate envelope must be confined within the envelope, using the flap adhesive as the primary means of closure
- The flap must close easily, adhere to the envelope and may be secured with tape if desired
- The design and shape of the envelope may not be altered or enlarged in any way to fit the contents

Flat Rate Boxes

- The inside dimensions for the two regular size boxes are 11” x 8.5” x 5.5” and 13.625” x 11.875” x 3.375”. The larger box dimensions are 12” x 12” x 5 1/2”. The new smaller box dimensions are 8.625” x 5.375” x 1.625”.
- The contents of the flat rate box must be neatly contained inside of the box with adhesive packaging tape
- The box must close securely and retain its shape when taped with adhesive
- The shape of the box may not be changed or enlarged to fit its contents

Making it Happen

There are a number of ways you can make flat rate pricing even more advantageous for your business.

**Smart Shipping Solutions.** With the right system, you can take the guesswork out of selecting carriers and service options. In addition to printing complete shipping labels, these systems compare real-time information from multiple carriers, so you can make informed choices based on delivery objectives, rates, service levels and business rules. It will even alert your customers via e-mail or the Internet that their package has shipped.

**Intelligent Mail Finishing.** The right mailing system makes it easy to apply the correct postage, without having to go to the post office. Systems equipped with IntelliLink® technology give you the ability to process and track Priority Mail® – right up until delivery confirmation at reduced USPS fees.
SHAPES THAT FIT

Balloon rates and dimensional weighting requirements increase the cost of oversized Priority Mail® parcels.

The Opportunity

The guidelines established in 2007 remain in effect, adding an extra cost to lightweight packages that take up a lot of space.

For Zones 1-4. Oversized packages less than 20 lbs. will be charged the 20-lb. rate. This “balloon” rating only impacts parcels where the length plus girth (the circumference) exceeds 84 inches.

For Zones 5-8. As packages traveling further involve air-transportation, these parcels are subject to dimensional-weight pricing. Dimensional weight (also referred to as “dim” weight) is a transportation industry standard, and is calculated based on the size of the package. This type of pricing will impact Priority Mail® packages larger than one cubic foot – or, in other words, if the length times width times height exceeds 1,728 inches.

Smart Mailstream Practices

This size-based pricing could increase shipping costs dramatically, so it pays to review your current packaging to determine if balloon or dim-weight charges would apply.

- **Reformat packages.** You may be able to revise packaging to avoid these extra charges. In some cases, it may be more economical to split a shipment into two separate packages (to keep the size smaller). In other cases, it may be more economical to combine two oversized items into a single package (to avoid paying the higher charges twice).
- **Consider USPS branded Priority Mail® containers.** These packages all conform to the guidelines, ensuring your mail will not be subject to dim-weight or balloon rating. They are also provided free of charge by the USPS.

Making it Happen

Your shipping department, as well as your package design groups, should all be made aware of the Priority Mail® guidelines. In addition to a good tape measure, shipping tools that can help include:

- **High-capacity Scale.** Electronic scales can calculate precise postage for accurate processing of mail and parcels. Many can provide rates and fees for USPS and UPS, as well as FedEx and DHL. A Differential Weighing Option enables you to stack mail pieces or parcels of differing weights on the scale. As pieces are removed, the proper postage is calculated and postage tape is printed.

- **Intelligent Mail Finishing.** The right mailing system makes it easy to apply the correct postage without having to go to the post office. Systems equipped with IntelliLink® technology also give you the ability to process and track Priority Mail® – right up until delivery confirmation.

Pitney Bowes provides a broad range of shipping solutions, such as:

- Mailing And Shipping Scales
- SendSuite™ Shipping Solutions
- Digital Mailing Systems

For more information, please contact us.
EXPEDITE DELIVERY FOR LESS

USPS services often provide added value for lower costs than private carriers.

The Opportunity

Zone-based pricing for Express Mail® means you will pay less for nearby destinations. Additional discounts are available for Corporate Accounts and those who qualify for volume incentives. Discount options will also be available on Priority Mail®, including incentives for customers who use electronic postage or meet other requirements.

Smart Mailstream Practices

Before sending a package or parcel, consider all of your choices.

**Priority Mail® Features**
- Expedited delivery of packages at an economical rate
- Delivered in 1 to 3 days nationally (often overnight locally)
- Delivered to all U.S. addresses, including P.O. boxes and military addresses
- Saturday and residential delivery are available at no additional charge
- Electronic Delivery Confirmation is available at no additional charge
- Flat-rate pricing available for packages up to and including 70 lbs.
- Incentives when you use electronic postage

**Express Mail® Features**
- Next-day delivery is guaranteed by noon or 3 p.m. to many destinations or your money back
- Delivered to most U.S. addresses, including P.O. boxes and military addresses
- Available 365 days a year. No extra charge for Saturday delivery, but a $12.50 premium will apply for Sunday and holiday delivery.
- Insured automatically up to $100 against loss or damage
- Additional merchandise insurance is available up to $5,000
- Includes proof of delivery with signature upon request
- Discounts for those who qualify for Corporate Accounts or volume incentives

For both types of service, the USPS offers free envelopes and boxes, no fuel surcharges, no residential surcharges, and no “wrong address” surcharge. The USPS also offers Carrier Pick Up service, including a Pick Up on Demand option.

**Package Services.** When time is not of the essence (and the contents are not-personal in nature), consider the lower-cost Package Service alternatives

Making it Happen

With today’s technology, it’s easier than ever to get more value out of expedited shipping.

**Built-in Confirmation Services.** The right mailing system makes it easy to apply the correct postage, without having to go to the post office. Systems equipped with IntelliLink® technology also give you the ability to enhance your Priority Mail® and First-Class Mail® experience with Delivery Confirmation™, Signature Confirmation™, Certified Mail™, and e-Return Receipt at reduced USPS fees.

**Smart Shipping Solutions.** With the right system, you can take the guesswork out of selecting carriers and service options. In addition to printing complete shipping labels, these systems compare real-time information from multiple carriers, so you can make informed choices based on delivery objectives, rates, service levels and business rules. It will even alert your customers via e-mail or the Internet that their package has shipped.

**USPS Announces New Incentives**

- **Express Mail®**
  - Commercial Pricing: Available to customers who tender payment via an authorized online service, Express Mail Corporate Account, or specifically authorized third-party postage vendor.
  - Commercial Plus Pricing: New for 2009 is Commercial Plus Pricing, an extraordinary value for high-volume Express Mail® and Priority Mail® users. New Commercial Plus prices are 14.5 percent less than retail on average for Express Mail® and an average of 7 percent less than retail for Priority Mail®.

- **Priority Mail®**
  - Commercial Pricing: Available to mailers who use specifically authorized postage payment methods.
  - Priority Mail® Commercial Pricing: Available to mailers who use specifically authorized postage payment methods.

For more information, please contact us.

Pitney Bowes provides a full line of solutions that can help you handle express shipments with ease.

- **SendSuite™ Shipping Solutions**
- **Ascent™ Multi-Carrier Package Management**
- **Mailing And Shipping Scales**
- **Digital Mailing System**
PACKAGE SERVICES: THE LOWER-COST ALTERNATIVE

For non-personal mail and parcels where speed of delivery is less important, package services provide added savings.

The Opportunity

Package Services mail includes Bound Printed Matter (BPM), Library Mail, Media Mail, and Parcel Post®/Parcel Select®. Despite modest increases, these services are significantly less expensive than other delivery methods. Large- and medium-size shippers may be eligible for volume discounts on Parcel Select® service. Plus, mailers can use a postage meter to apply postage.

Smart Mailstream Practices

The USPS package service options may provide you with the most cost-effective delivery.

- **Compared to Higher-Cost Carriers.** These package service options, including Parcel Post, may allow you to save money. You can also add extra services such as Delivery Confirmation™, Return Receipt for Merchandise, Signature Confirmation™ and Collect on Delivery (COD).

- **Compared to Expedited Delivery.** When time is not of the essence, these package service options may make sense, as you can normally expect delivery between two and nine days.

- **Avoid balloon-size ratings.** Parcels that weigh less than 20 lbs. but measure more than 84 inches in combined length and girth are charged the applicable rate for a 20 lb. parcel (see prior strategy, Shapes That Fit.) Any parcel that measures more than 108 inches (but not more than 130 inches) in combined length and girth must pay the higher ‘oversized rate’ regardless of weight.

Making it Happen

Shipping smarter means having the right tools.

**High-capacity Scale.** Electronic scales can calculate precise postage for accurate processing of mail and parcels. Many can provide rates and fees for USPS and UPS, as well as FedEx and DHL. A Differential Weighing Option enables you to stack mail pieces or parcels of differing weights on the scale. As pieces are removed, the proper postage is calculated and postage tape is printed.

**Built-in Confirmation Services.** The right mailing system makes it easy to apply the correct postage, without having to go to the post office. Systems equipped with IntelliLink® technology also give you the ability to enhance your Priority Mail® and First-Class Mail® experience with Delivery Confirmation™, Signature Confirmation™, Certified Mail™ and e-Return Receipt at reduced USPS fees.

**Smart Shipping Solutions.** With the right system, you can take the guesswork out of selecting carriers and service options. In addition to printing complete shipping labels, these systems compare real-time information from multiple carriers, so you can make informed choices based on delivery objectives, rates, service levels and business rules. It will even alert your customers via e-mail or the Internet that their package has shipped.

AUTOMATED ADDRESS CORRECTIONS

Going to electronic (vs. paper-based) address correction is still more economical.

The Opportunity

The USPS has stated that it wishes to reduce Undeliverable as Addressed Mail (UAA) significantly by 2010. To support that initiative, they continue to provide incentives – including free processing – for certain types of Address Correction Service (ACS).

Smart Mailstream Practices

Updating addresses makes smart business sense because more of your mail will be delivered to its intended recipient in a timely manner. And even with this latest price increase, there will be two ways you can save money.

• **Electronic ACS.** Even with a two-cent increase on First-Class Mail®, updating addresses electronically is significantly less than paper-based methods. To participate in ACS, mailers must modify their mailing label to include a mailer identification (participant) code assigned by the National Customer Support Center (NCSC).

• **Automated ACS.** It is expected that mailers who adopt the new Intelligent Mail® barcode will qualify for lower postal rates beginning in November, 2009, but mailers who make the switch today can start saving right away. More efficient address corrections are just one of the many benefits of this new barcode. The USPS will provide free Address Correction Service on pieces eligible for full-service Intelligent Mail. After receiving the corrected data, you can update your source data or start whatever process you have in place for notification and consent – improving overall data quality.

Making it Happen

There are a range of data quality solutions that can help you keep your customer data up-to-date by using the USPS Address Correction Services.

**Barcode Printing:** Many software solutions give you the capability to print professional barcodes as part of your mailing address. You may also want to use a specialized address printer, which provides crisp, precise, direct-to-envelope imaging to create a more professional look. With the addition of spot color and personalized messages, these solutions can help ensure more of your mail is opened and read.

**Intelligent Mail® Solutions.** How you manage the near-term implementation of this expected mandate could have long-term implications for your business. Put simply, there are four ways you can apply the barcode, and Pitney Bowes has expertise in each of these four disciplines, which provides for a thorough review of the advantages, disadvantages and challenges, plus insights into the many ways you can simplify the process, help ensure compliance, reduce postage and add value to your business. Depending on the size of your business and the number of applications involved, you may want to begin with a one-on-one consultation or a full-scale readiness assessment.

**To learn more about these strategies, contact us.**

**Pitney Bowes offers a range of mail management software solutions that will facilitate electronic ACS™ notification, including:**

- SmartMailer™ Mail Management Software
- AddressRight® Pro Software
- Intelligent Mail® Assessments

**Group 1 Software offers the most advanced address cleansing solutions, which can also facilitate OneCode ACS™**

- CODE-1 Plus® Computer Program
- Finalist®
ELECTRONIC RETURN RECEIPT

Say goodbye to “green cards” and enjoy even greater savings.

The Opportunity

The USPS has increased the cost of paper-based return receipts (Green Cards) to $2.30, giving mailers the opportunity to save $1.20 every time they opt for Electronic Return Receipts instead.

<table>
<thead>
<tr>
<th>Return Receipt Fees</th>
<th>May ’08</th>
<th>May ’09</th>
</tr>
</thead>
<tbody>
<tr>
<td>Electronic Receipts</td>
<td>$1.00</td>
<td>$1.10</td>
</tr>
<tr>
<td>Paper-based Receipts</td>
<td>$2.20</td>
<td>$2.30</td>
</tr>
</tbody>
</table>

Smart Mailstream Practices

Managing documents electronically can save you time and money. And, with the savings for Electronic Return Receipts (ERR), there is no better time to shift to ERR.

- **Electronic Return Receipt (ERR).** With ERR, the recipient's signature is collected and stored digitally. Unlike green cards, receipts therefore cannot be “lost”. You can print the digital receipt when needed, or download the delivery date into a spreadsheet or data file. And the cost per electronic receipt is less than half that of the old paper-based alternative.

Making it Happen

Today’s smart systems add to the benefits of ERR:

**Built-in Confirmation Services.** You can choose a system equipped with IntelliLink™ technology for Delivery Confirmation™, Signature Confirmation™, Certified Mail™ and e-Return Receipt built in. You’ll benefit from reduced USPS fees, and the mailing process couldn’t be easier.

**Online Tracking.** ERR makes electronic online tracking of your accountable mail simple: you can check status through ‘My Account’ on pb.com or the USPS website. Either way, you’re only one click away from all your delivery details.

Pitney Bowes offers an array of solutions designed to make your mailing process run more efficiently, including:

- IntelliLink® Technology
- SendSuite™ Shipping Solutions
- Digital Mailing Systems

To learn more about these strategies, contact us.
CONFIRMATION SERVICES

Choosing the right service to meet your needs can greatly reduce what you spend on USPS delivery confirmation.

The Opportunity

Even with modest increases in most services, there is still a large difference in costs among the various options.

Smart Mailstream Practices

Select the least expensive option that meets your needs. Based on the new rates, you may want to consider:

- **Proof of Delivery.** Instead of Certified Mail™, you may want to consider Delivery Confirmation,™ which could save you up to $2.61.

- **Evidence of Mailing.** Instead of Certified Mail™, request a Certificate of Mailing, which would save you $1.65.

- **Evidence of Mailing and Proof of Delivery.** Instead of Registered Mail, take advantage of Certified Mail™, which would save you $7.80.

- **Proof of Delivery with Signature.** Instead of Certified Mail™ with a Return Receipt, choose Signature Confirmation,™ which could save you up to $3.15.

Making it Happen

Efficiencies and savings come from automation, and today you can manage both confirmation and tracking electronically

**Built-in Confirmation Services.** You can choose a system equipped with IntelliLink™ technology for Delivery Confirmation,™ Signature Confirmation,™ Certified Mail™ and e-Return Receipt built in. You’ll benefit from reduced USPS fees, and the mailing process couldn’t be easier.

**Online Tracking.** We make electronic online tracking of your accountable mail simple: you can check status through ‘My Account’ on pb.com or the USPS website. Either way, you’re only one click away from all your delivery details.

PERMIT MAIL PAYMENTS

New ways to pay for permit postage can save you time and money.

The Opportunity

In addition to the increase in actual permit postage, the permit imprint application fee increases by $5 to $185.

Smart Mailstream Practices

There are two smart ways to counter the impact of permit-postage rate and fee increases:

- **Streamline your postal payment process.** Instead of tying up your funds in advance of each mailing, you can pay later for permit mail. Put your dollars to work: better cash management can help offset rising fees and higher postage expenses.

- **Presort your mail for savings.** Significant workshare discounts are available for presorted mail. You can presort your mail yourself or turn to a presort service, such as Pitney Bowes Presort Services.

Making it Happen

Creative postage-payment options and presort alternatives are among the many cost-saving opportunities available through Pitney Bowes.

**EasyPermitPostage**: This convenient, automated service eliminates the need to pre-pay or bring a check to the Post Office for postage on permit mail. You'll receive a statement once a month showing the exact postage used and can pay after you mail rather than tying up your funds in advance. As a Pitney Bowes customer, you can even choose to add permit postage expenses to your Purchase Power account.

**Purchase Power Rewards**: The Purchase Power account enables Pitney Bowes customers to earn money-saving rewards that can be redeemed for free postage. By adding your permit postage expenses to your Purchase Power account, you'll have one more way to offset the increases in rates and fees.

**Presort Options.** Software that is CASS-certified™ and PAVE-certified will increase your mailing accuracy, help you comply with USPS requirements and enable you to presort for workshare discounts. You can also arrange for your mail to be handled by a third-party presort service – you’ll gain valuable discounts without having to perform the presort process.

Rate Change Central
Your one-stop resource for rate change instructions and downloads for your Pitney Bowes meters, scales and software. Get answers to your questions – and the support you need – at www.pb.com/ratechange.

www.pbpostalinfo.com
Deepen your understanding of the postal rates – and learn how you can save. This robust web site is your resource for tips, information and practical advice. Special features include:

- **New Intelligent Mail® Portal** – learn more about the new barcode requirements slated for May 2009, which could represent significant changes for many businesses.
- **Postal Savings Wizard** – answer a few questions to see which strategies could have the biggest impact on your bottom line.
- **Postal News** – keep up with all of the changes, including meter migration and new move update requirements scheduled for later this year.
- **Postage Saving Solutions** – find out about strategies for offsetting the postal increases including the Pitney Bowes Postal Discount Program.

Shape Based Template
This handy guide makes it easy for you to tell if your mailpiece conforms to the guidelines for letters, flats and parcels. It’s as easy to use as a ruler! (Available through the Online Store at www.pb.com or call 1-800-243-7824.)

Shape Based Rating Module
Designed for DM800™, DM 900™ & DM1000™ Mailing Systems with Weigh-on-the-Way technology, this module verifies the length, width, thickness and weight of a mailpiece automatically – so you can apply the correct postage every time.

Your Pitney Bowes Mailstream Team
Whether you’re looking for a customized one-on-one analysis – or simple answers to your most pressing questions – your local Pitney Bowes Team can provide you with the mailstream expertise you need to stay ahead.
