

The In-House Mailstream Solution — Integrated Document Printing

Pitney Bowes Inserting System DI900/DI950 Series

Integrated document printing turns your Pitney Bowes DI900/DI950 inserter into a fast, complete mail production shop. You'll be able to handle your mailstream — from document design and printing right through mailing — in a single streamlined process, for one-stop mail piece generation.

What's more, you can enhance the accuracy of your mailings through use of special software.

The system verifies that your customers receive the correct information and documents are not lost. And with more accurate invoice mailing, cash flow improves. You can document that each mailing is complete and correct.

Seamless Integrated Printing Gives You Better Control.

Lower Cost and Faster Turnaround

Integrated document printing means mailings can go out faster and at a lower cost per piece. There's no need to coordinate with other departments or vendors. Pages are generated, printed, assembled, folded, inserted and mail is metered¹ on one system, saving a lot of time and labor.

- > Reprint damaged pieces on the fly. With integrated document printing you do not need to wait while someone else reprints damaged pieces. Process Verification lets you detect missing, duplicated or out of order pages, then automatically reprint and reinsert damaged pieces without tedious tracking and manual handling.
- > Benefit from high-performance printing. Save paper and postage with two-sided printing capabilities.

With the optional Postage Discount Program (PDP), where applicable, you can benefit from:

- > Postage savings: up to 5%
- > Free sortation: Pitney Bowes will sort the mail to get the USPS® approved postage discounts
- > Free mail pick-up: saves time and money – Pitney Bowes will pick up your mail at the office (1 or 2 oz. First Class letter mail only)

Make the Right Impression

Integrated document printing helps you create personalized mailings that look professional and help you get higher response rates. Choose the color printing option for maximum impact. Color text and highlighting can increase response rates for some companies by 80 to over 250 percent. In a recent study, personalized mailing, that used color resulted in 10 times the response rate of all-black printing.²

Two-sided printing demonstrates your company's concern for environmental sustainability.

¹ With optional mailing machine interface

Get the Business Flexibility You Need

Use integrated document printing for applications ranging from invoices and statements to direct mail and marketing materials. System components work on a stand-alone basis for maximum flexibility. Print without inserting (e.g., to produce hand-outs or reports), or insert materials that were not produced on the printer.

The paper path on the inserting system DI900/950 series is covered to help you comply with privacy policies and requirements.

Selected Features:

- > Black-and-white printing—up to 50 pages per minute simplex, up to 20 pages duplex
- > Color printing—up to 28 pages per minute simplex, up to 15 pages duplex
