### Why Pitney Bowes?

Because we've solved it.  
We've combined SaaS  
Ecommerce technology  
with our international  
delivery network. It's a  
market-leading solution,  
from the company with  
years of Ecommerce  
shipping experience.

We pioneered Ecommerce  
shipping technology in the  
dot-com era. We're experts  
in running an international  
postal network. And we've  
invested millions to bring  
together our end-to-end  
global shipping solution.

As one of the most trusted  
names in Global Ecommerce,  
we offer the complete  
package for your parcels.

# ClearPath™ Global Checkout

The proven solution for fully-landed  
shipping costs in the shopping cart.

### How It Works

We start by setting up a catalogue exchange. We run each SKU through an "internationalization engine," which finds the harmonization code for each product. Notably, we can support millions of SKUs. Even if your SKUs change daily, we can manage all new updates. When a consumer puts a basket of goods into the shopping cart, we check import and export restrictions for these goods and deliver fully-landed costs in real-time. Because this is an API-driven service, the retailer maintains control of the shopping cart at all times. See below.

### Page Sample:

The screenshot shows a shopping cart interface with three steps: Step.1 Shipping, Step.2 Billing, and Step.3 Place Order. The product listing includes a product image, name, item number, color, width, and size. The summary table shows the order subtotal, shipping cost, duty and tax, and the final order total. A red circle highlights the 'Duty & Tax' line item.
